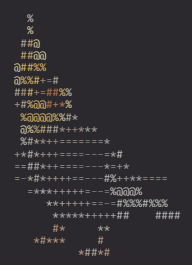
About

Backend engineer who likes small, fast tools

web example.com
email alex@example.com
github github.com/example
location Somewhere, Earth



Experience

Acme Analytics Remote
Backend Engineer 03/2024 - Present
- Moved report generation from nightly batches to an event stream; reports now land in under a minute instead of next morning
- Cut p95 latency of the query API from 840 ms to 120 ms by caching query plans and dropping an ORM layer
- Run the on-call rotation for four services; wrote the runbooks that took median incident time from 50 to 20 minutes

Bakery around the corner 2022
Order website, summer job
- Replaced phone-in cake orders with a one-page form; the owner still uses it

Education

Example University Somewhere
B.Sc. Computer Science, thesis graded 1.3 10/2020 - 09/2023
- Thesis: compressing time-series indexes with learned models, 3x smaller than the B-tree baseline at equal lookup time

Projects

tinykv 2024
Embedded key-value store in Rust
- Log-structured store in 2,000 lines; used as the storage layer of two of my other tools

github.com/example/tinykv

weather-on-e-ink 2023
- Raspberry Pi and an old e-ink display showing the forecast; runs for three weeks on one charge

Awards

2023 **2nd place, regional hackathon** Somewhere
Example City Hackdays

Skills

Languages	English (native) · German (B2)
Programming	Go · Rust · Python · SQL
Infrastructure	Linux · Docker · Kafka · PostgreSQL
